

Information update (5/11/09):

The TIPSS-4 Team is diligently working on the RFPs. We do not have a projected date for the release at this time, but as soon as an anticipated date can be determined, the milestone schedule on this website will be updated. The official release will be posted on FedBizOpps. No RFPs will be posted to this website.

Note: For Small Business offerors, who are proposing under the TIPSS-4 SB Cybersecurity task area, you are not required to be CMMI-SW or CMMI-DEV Level 2 certified at time of proposal submission. However, the certification can be obtained after award, but the prime contractor will not be allowed to bid on any security software development task orders issued under the Cybersecurity task area until the prime contractor shows it has become CMMI-DEV Level 2, version 1.2 certified. Thank you for your continued interest.
